

# PLASTERER CARE PLUS

We are here to keep you up and running!

With an active JDLink subscription which is included on all C&F models for first three years, you have the benefit to receive these features!

## JDLink™ machine monitoring system

State-of-the-art telematics that come standard on most Deere machines to collect key machine data such as engine hours and idle time, and transmit it to you via the internet to a laptop or mobile device.

## Machine health prognostics

A Deere exclusive that interprets JDLink data, fluid analysis, and machine-inspection results, then advises you and your dealer on proactive steps to maintain overall machine health.

## Remote diagnostics and programming

Another Deere exclusive that enables your dealer to access diagnostic trouble codes, record performance data, and update software remotely (on remote certified controllers), without a jobsite visit or the drive-time expenses that comes with it.

## John Deere is the Leader in Telematics Technology!

John Deere created and owns the bragging rights for Machine health prognostics and Remote diagnostics and programming!

These tools are available to you with an active JDLink subscription. Plasterer Care program can provide these tools to work for you on an as needed basis.

Plasterer Care Plus can proactively manage the health of your machine through machine health prognostics to maximize uptime and proactively minimize failures.

Would you like to have a Hybrid remote fleet manager to watch your investment? We can provide that service! With a Care Plus Plan, we can provide Unlimited remote diagnostics and programming and Pro-active red alert monitoring. Contact us and ask for details.

We are here to keep you up and running! Minimize your operating costs by maximizing the potential of your machine technology.

With four tier levels of training to become John Deere Certified on a product, you can be sure your machine will be taken care of quickly and efficiently.

Diagnosing problems and keeping your equipment running is what you can expect from Plasterer Equipment. We understand the complexity of your equipment and have the knowledge and skills required to maximize your uptime.

John Deere Certified technicians are your assurance of a job well done.
